INTRODUCTION

This work in this preliminary edition is intended primarily for beginning students in cataloging and classification. It is designed to provide a quick reference to the selection of specific classification tables by means of an alphabetical list of subjects. While it is intended for students, the list may be useful to anyone using the L.C. schedules.

The headings used for this Index are taken from the L.C. classification outline, complete with modifiers and sub-divisions. No attempt has been made to develop see references in this edition.

The Index is followed by Letter Combination used by the Library of Congress. Out of the possible 702 combinations, the classification uses only 202 letter combinations (including single letters). There are still 500 combinations that can be used for possible expansion or modification.

The list of editions, dates of reprints, and prices are based on the December 1966 information. Anyone wishing to purchase the schedules should contact the Library of Congress for availability and current price list.

The Outline (pp. 61-86) has been included to show the principles (or lack of principles) upon which the Library of Congress classification is built. Students can clearly see that summaries of schedules A (general works: collections - AC; encyclopaedias - AE; general works - AG; indexes - AI; museums - AM; newspapers - AN, etc.) and M (music - M; literature of music - ML) are not used in the remaining schedules. Students can also analyze the distribution of number combinations (e.g.: History and Topography of Europe - DA - DR; Asia - DS; Africa - DT; Australia and oceans - DU; gypsies - DX; America - D-F; etc.).

The Outline will be used in advanced cataloging courses in exercises of modification, expansion, and modernization of the classification.

Libraries, using Library of Congress Classification, might wish to make The Index to Library of Congress Classification Outline available to their user, as has been done already in some instances (notably the C. S. Mott Library in Flint, Michigan, where Mrs. Arthur Hungerford completed an index in 1959).
